

Table of Contents – Part One

Invited Talk

1. Anti-Phishing in the Era of Deepfakes 1
Lok Sang Kee, Maisie Marks, Anne V.D.M. Kayem

Knowledge Graphs and Graph Intelligence

2. Adaptive Structural Modality Enhancement in Score Calculation for Knowledge Graph Completion 18
junhui Deng, yingshan Shen, weizhong Zhang, guanxin Hou, shuqi Chen
3. Knowledge Graph Adapter-Based Augmentation Testbed for Large Language Models 33
Ushar Ali, Steven Lynden, Akiyoshi Matono, Toshiyuki Amagasa
4. Evidence-Supported Credit Risk Report Generation Using News-Centric Financial Knowledge Graph 39
Rocío Jiménez-Villén, Ziwei Xu, Ying Chen, Oscar Araque, Ryutaro Ichise
5. Fair Link Prediction in Social Network with Intersectional Sensitive Attributes 45
Lei Wang, Yifeng Peng, Yan Zhu, Yiqiang Peng

Graph Data Management and Processing

6. Evaluation of subgraph-querying from databases for mini-batch training Graph Neural Networks 60
Daniel Walke, Shweta Pandey, Gunter Saake, Alexander Jarasch, David Broneske, Robert Heyer
7. Exploring Topographic Data with Transitive Closure on Graphs 75
Adam Nelson-Archer, Christoph F. Eick, Carlos Ordonez
8. Design Space of Iterative Graph Stream Processing on DAG Constrained Systems 90
Komal Mariam, Salman Ahmed Shaikh, Hiroyuki Kitagawa, Akiyoshi Matono
9. Inspecting Neural Networks with Queries 105
Dipta Chandra Paul, Hashirul Quadir, Nicholas Anderson, Carlos Ordonez
10. Layered Evidence-Centric Graph Construction for Explainable Multi-hop Question Answering 120
Weiguo Zeng, Haoyang Xie, Zhenxuan Chao, Qiuxia Wu, Haoyu Liu, Siyu Li, Jianfeng Qu, Zhixu Li

Recommendation, Search and Information Retrieval

11. MIRAGE: Multi-Intent Reasoning and Adaptive Graph Embedding for Recommendation 135
Baofeng Ren, Tianyuan Yang, Chenghao Gu, Boxuan Ma, Shin'ichi Konomi
12. POI Recommendation with Multi-Granular Weather Information 150
Koki Mitta, Qiang Ma
13. Beyond the Window: Scaling Listwise LLM Reranking via Candidate Filtering 165
Louis Remy, Sandra Bringay, Pascal Poncelet, Maximilien Servajean
14. PIPER: Content-Based Table Search via profiling and LLM-Generated Pseudoqueries 181
Riccardo Terrenzi, Matteo Falconi, Serkan Ayyaz, Pierluigi Plebani

Large Language Models and Multi-Agent Systems

15. Centralized Task Planning and Dynamic Device Collaboration in LLM-based Multi-Agent Smart Home Systems 196
Zeyi Sun, Jinghua Groppe, Sven Groppe

16. KMAP: Knowledge-controllable Multi-Agentive-llm Peer-learning system.....	211
<i>Kosei Nakazono, Qiang Ma</i>	
17. On the Reliability of Open-Weight Language Models for Relational Data Generation under Structural Constraints	217
<i>Saba Zamankhani, Kai Uwe Sattler</i>	
18. Towards Efficient Quantity Retrieval from Text: An Approach via Description Parsing and Weak Supervision	229
<i>Yixuan Cao, Zhengrong Chen, Chengxuan Xia, Kun Wu, Ping Luo</i>	
19. Lightweight Strategies to Mitigate Small VideoLLM’s challenges in Video Summarization	235
<i>Lorenzo Vaiani, Luca Cagliero, Wiktorina Woronko</i>	
20. From Patent Search towards Agentic Deep Research (A Multi-Agent AI System for Automated Patent Deep Research and Analysis).....	250
<i>Mustafa Sofean and Hidir Aras</i>	

Data Governance, Quality and Integration

21. An Evidence-Based Method for Assessing Data Governance Maturity.....	265
<i>Marcio Ferro, Edison Camilo, Flavio Medeiros, André Magno, André Almeida, Patrick Brito, Renata Pereira, Juliana Saraiva</i>	
22. Towards Semi-Automated Data Supply Chain Management.....	280
<i>Thomas Hütter, Manuela Geiß, Christian Lettner, Tobias Rehberger, Gerald Aigner</i>	
23. MultiCleansing: Scalable Simultaneous Repairing of Data with Multi-Types of Errors	286
<i>Savong Bou, Toshiyuki Amagasa</i>	
24. Evaluating Data Quality Tools: Measurement Capabilities and LLM Integration	292
<i>Tobias Rehberger, Thomas Hütter, Lisa Ehrlinger, Wolfram Wöß</i>	

Database Systems and Query Processing

25. A Workload-Driven Clustering-Based Schema Transformation Model for Relational to NoSQL Document Stores.....	298
<i>Neha Bansal, Vikas Vikas, Preeti Mehta, Samridhi Singhal</i>	
26. Bloom Filter Trees for Efficient Evaluation of Conjunctive Queries in LSM Stores	305
<i>Wojciech Macyna, Artur Trzesniewski, Carlos Ordonez</i>	
27. Feasible Plan Generation with Ambiguity-Boundedness in Cross-Model Query Processing	320
<i>Subhasis Dasgupta, Amarnath Gupta</i>	
28. An Improved Representation for Temporal JSON	335
<i>Bishal Sarkar, Curtis Dyreson</i>
